National Forum on Education Statistics
Resources 1990-2021

The National Forum on Education Statistics (Forum) is a voluntary, democratic, participative group that is committed to improving the quality, comparability, and usefulness of elementary and secondary education data while remaining sensitive to data burden concerns. The mission of the Forum is to plan, recommend, and develop education data resources that will support local, state, and national efforts to improve pre-kindergarten through secondary education throughout the United States. From 1990 to 2021 the Forum has produced

73 documents on education data issues useful to stakeholders, such as data governance, privacy, attendance, discipline, and early warning systems

9 releases of the School Courses for the Exchange of Data (SCED), a voluntary, common classification system for prior-to-secondary and secondary school courses

5 videos including "About the Forum" and 4 videos about the School Courses for the Exchange of Data (SCED)
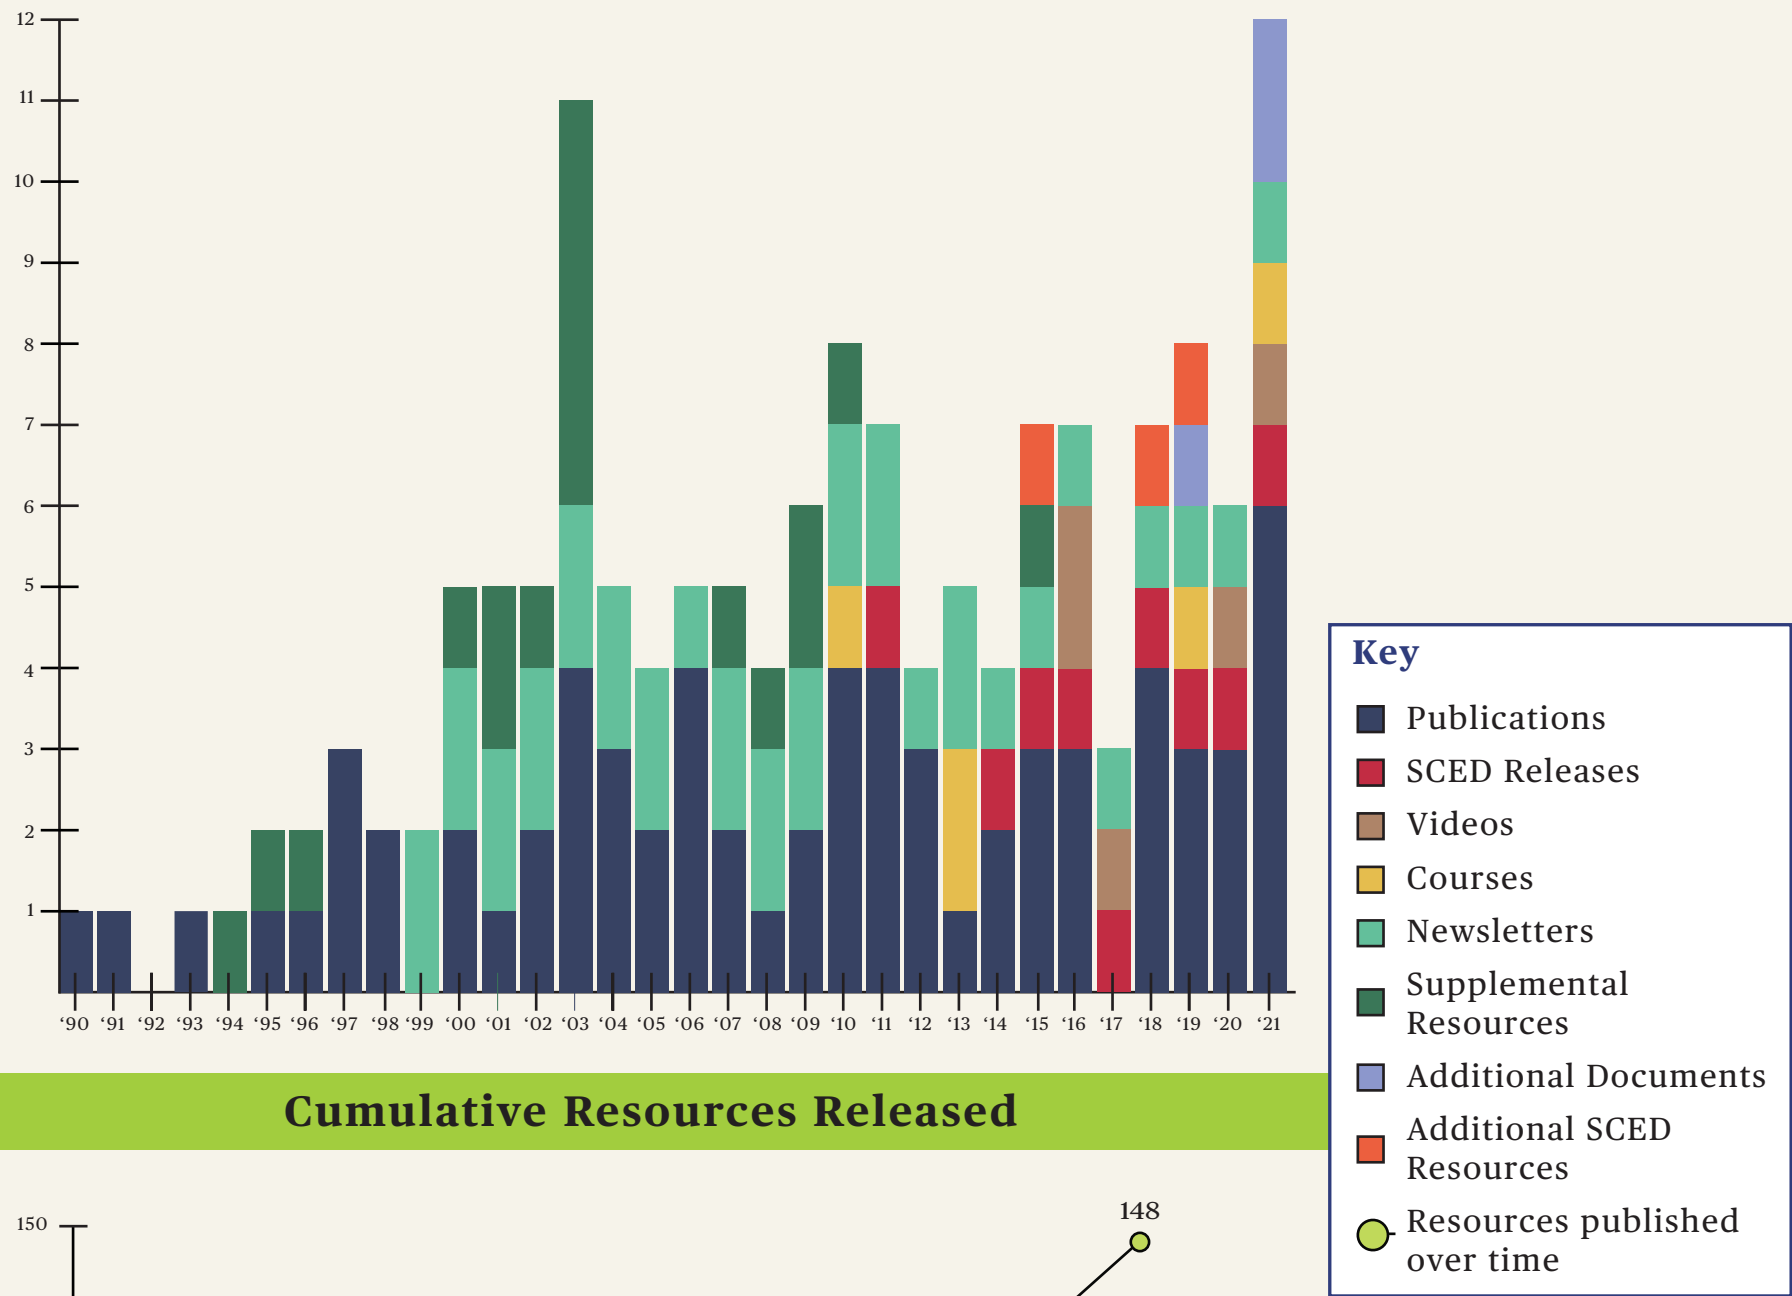

5 online courses based on Forum best practice publications, covering education data improvement, data ethics, and data visualization
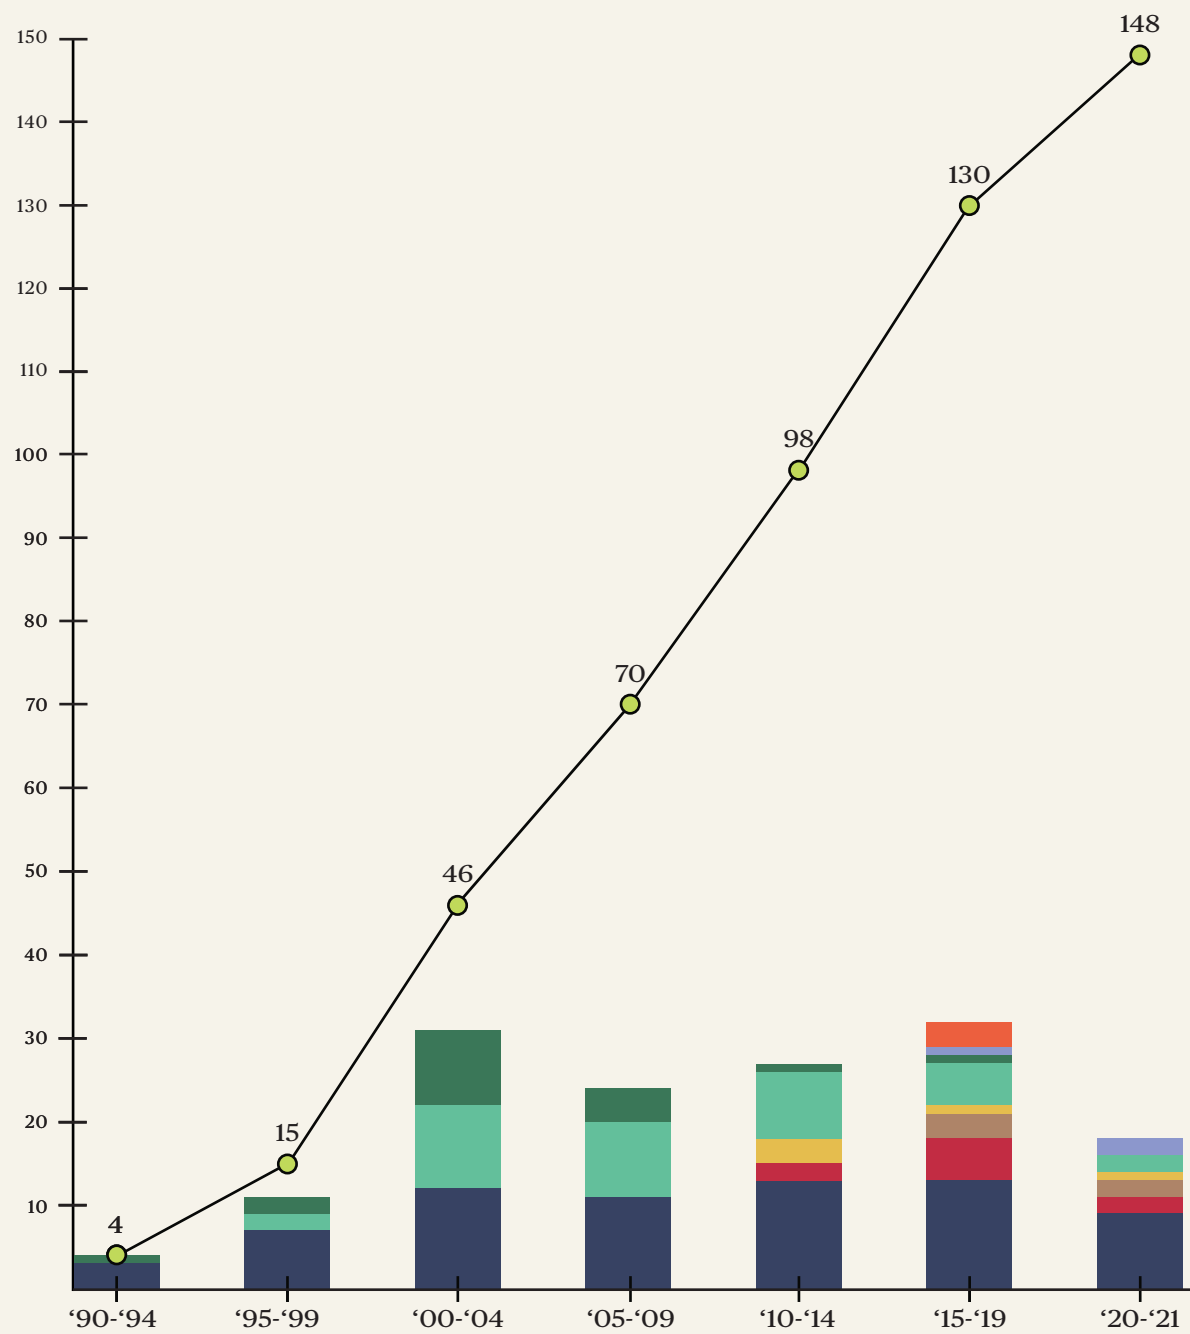

57 supplemental resources to support the education data community, including addendums, handbooks, newsletters, and data catalogs
